6-Save your life and	<b>f</b> -breathing in a smoke from a cigarette
	<b>g</b> -to himself and to others

1+..... / 2+..... / 3+..... / 4+...../ 5+..... /6+.....

## 4/ Circle the right option ( 3 marks)

People , animals and plants need food, water, and oxygen. Each must be clean and available for humans and other ( **live – living- life** ) creatures to survive. Unfortunately, water pollution throughout the world can ( **be- being- was** ) a problem for people and other organisms in need of safe drinking water. The water pollution occurs when different ( **visibly- invisible- visible** ) particles, chemicals, and other substances cause the water to become unsafe. This poisonous water ( **contaminating- contamination – contaminates** ) the aquatic creatures. Sometimes, the pollutants flow ( **direction- direct-directly** ) into the water from a factory. It can also flow from rainwater mixed with farm chemicals, construction sites, or other places ( **where-that- who** ) release unsafe chemicals. All rainwater eventually seeps into the ground and then flows into rivers, lakes, or streams that may be the source for drinking water.

# Work hard

## Tapescript

I hate pollution. It makes me really angry. I think pollution is greed. People don't care about the environment so they pollute the air just to make lots of money. Big companies are the worst. They pretend they're not polluting. They have the money to say they are "green". Pollution affects us all. We are all less healthy because of companies that pollute the air or our rivers. Everybody needs to think about how we can reduce the amount of pollution we create. Not using the car when we can walk is one way. Turning off lights we don't need is another. Barack Obama says he's going to do his best to help the Earth. I really hope he does because if pollution gets any worse, we'll be in seriously big trouble.
